

After having read chapter 1, excerpted from the textbook *Quantum computing* by Y. Billing, answer the following questions:

1. What is your background (field), Physics, Mathematics, Computer Science or other?
2. Did you have any difficulties reading the textbook?
3. If you had any, what are they?
4. Did you find any particular interesting aspect in the textbook?
5. What is the interesting aspect(s)? Why did you find it (them) interesting?
6. Do you think the chapter is suitable for a student of Computer Science?
7. Explain why you answered *yes/no*:
8. Do you think the chapter is suitable for a student of Physics?
9. Explain why you answered *yes/no*:
10. Do you think the chapter is suitable for a student of Mathematics?
11. Explain why you answered *yes/no*:
12. Would you use it in your class?
13. Explain why you would or would not use it:
